

Small Business Owners & Leaders:

At the [Capitol Regional Innovation Cluster Consortium \(CRICC\)](#), we understand these are challenging economic times to grow and expand your enterprises. Nevertheless, we are committed to fostering growth for American businesses.

Over the last 2 years, CRICC has worked with Earlii, a technology commercialization firm, to adapt their software for finding federal and state contracts and capital resources (grants, loans, and venture capital) to assist businesses in their growth.

CRICC is excited to offer initial, complimentary access to three searches for federal/state contracts and capital for business enterprises on the Earlii tool.

You can sign up for a free account and [find contracts and capital](#) with our AI Earlii Tool on this link. After the gratis period, you will have the option of continuing to use the system for a fee as follows:

Monthly SaaS Fees: \$50 a month (50% off with coupon - 50CRICC)

Annual: \$350 a Year (25% off with coupon - 25CRICC).

<https://app.earlii.com/register?code=7e7f4607-da63-43cd-ba5c-4533d81b76b0>

(Link only works on a desktop computer today. Mobile version coming soon.)

NOTE: Our review of the pilot we conducted indicates that this tool is most effective when the utilizing business owner takes the time to really examine and understand its powerful potential or assigns a staff member to interact with the system with appropriate keywords to search for contracts, grants, and other financial resources for that business. As an AI tool, any input will provide results; improved results come with some additional attention and follow-through. Modify your input and rerun to see if your results improve.

Feel free to contact us directly with any questions at kenneth.clark@cricc-inc.com or at 301-502-3247. While the tool is pretty self-explanatory, we are available to provide coaching or do a demo with you as needed.
